IN THE CLAIMS:

Please cancel claims 20-31 without prejudice.

1. (Original) A pin for a cooling system, comprising:

an inner layer formed of a first metal, the inner layer being hollow, wherein the inner layer is coupled to a header of the cooling system; and

an outer layer formed of a second metal, the outer layer being coupled to the inner layer via a coupling material.

- 2. (Original) The pin of claim 1, wherein the cooling system is a radiator.
- 3. (Original) The pin of claim 1, wherein the cooling system is a condenser.
- 4. (Original) The pin of claim 1, wherein the coupling material is a clad material.
- 5. (Original) The pin of claim 1, wherein the pin is coupled to a header of the cooling system.
- 6. (Original) The pin of claim 5, wherein outside edges of the inner layer are brazed to an inner surface of the header.
- 7. (Original) The pin of claim 5, wherein a bottom edge of the outer layer is brazed to a top edge of the header.
- 8. (Original) The pin of claim 1, wherein at least one of the first metal and the second metal is aluminum.
- 9. (Original) The pin of claim 1, wherein at least one of the first metal and the second metal is coated with a clad material.
- 10. (Original) A cooling assembly, comprising:a cooling system to cool an automobile; anda pin to couple the cooling system to the automobile, the pin including

an inner layer formed of a first metal, and is hollow, wherein the inner layer is coupled to a header of the cooling system, and

an outer layer formed of a second metal, the outer layer being coupled to the inner layer via a coupling material.

- 11. (Original) The cooling assembly of claim 10, wherein at least one of the first metal and the second metal is aluminum.
- 12. (Original) The cooling assembly of claim 10, wherein the cooling system is formed of aluminum.
- 13. (Original) The cooling assembly of claim 10, wherein the cooling system is a radiator.
- 14. (Original) The cooling assembly of claim 10, wherein the cooling system is a condenser.
- 15. (Original) The cooling assembly of claim 10, wherein the coupling material is a clad material.
- 16. (Original) The cooling assembly of claim 10, wherein the pin couples the cooling system to an engine compartment of the automobile.
- 17. (Original) The cooling assembly of claim 10, wherein at least one of the first metal and the second metal is aluminum.
- 18. (Original) The cooling assembly of claim 10, wherein outside edges of the inner layer are brazed to an inner surface of the header.
- 19. (Original) The cooling assembly of claim 10, wherein a bottom edge of the outer layer is brazed to a top edge of the header.

20-31 (Cancelled)
